

# Our Copper Flashing still has two sides. But no downside.

## York redefines copper fabric flashing.

- The original copper fabric flashing.  
Reinvented for today.
- You needed it. We made it.
- All the performance of copper.  
None of the problems of asphalt.
- Works in all temperatures —  
won't get brittle or soften.
- Color-coded rolls help identify  
different weights.

**YORK**  
Since 1935
