CONTINUING EDUCATION

Through-Wall Flashings and Transition Membranes: Selection and Installation

2026 Course Description

This presentation will cover a detailed explanation of the challenges and solutions facing through-wall flashings and transition membranes, provide a thorough description of the characteristics of several types of membranes, emphasize the importance of compatibility, and explain proper installation techniques.

Learning Objectives

- Understand how to design a resilient and durable flashing system that will minimize life cycle costs
- Explain the performance criteria used to specify through-wall flashings and transition membranes
- Define the attributes of a variety of membrane materials
- Understand the compatibility between cavity wall components

Presenter Qualifications

York's team of passionate industry professionals will share their knowledge from formal training and field experience over the years.
