

No-Bow Termination Strip

Key Properties

- Will not bow like rigid termination bars
- Self-adhering termination strip
- Butyl adhesive for primerless installation
- 60 mil TPO reinforced facer
- Thick face prevents fastener pull-through, maintaining a tight, reliable seal
- Adapts to building movement for a continuous seal
- Easy to cut in the field to desired length
- Reduces labor with single person installation
- Will not corrode or rot
- UV stable
- 50-foot rolls allows for continuous installation without seams
- Compatible with all flashing materials, drainage boards, and waterproofing membranes

Description

No-Bow Termination Strip is a direct replacement for traditional rigid termination bars. Self-adhering and mechanically fastened, the **No-Bow Termination Strip** prevents bowing and ensures a watertight bond against the substrate.

Available in:
2" x 50' rolls
4 rolls per box (200 lf)
