Adhesion for Performance: A Tale of Adhesive Compatibility

Test strips are easily pulled off of the peel & stick membrane with little resistance, <2 psi

Test strips break while pulled off of the stainless steel membrane due to superior adhesion, >15 psi

Protecting Walls from Construction Moisture

Protecting the walls from moisture during construction is the most effective means in preventing damage to the installed air barrier.

Review ABAA's Position Paper on how to stopwater from getting into your walls during construction

Proper Roof Details

The roof penthouse and ductwork penetrating the roof or wall air barrier is often missed when discussing air barrier continuity.

yorkflashings.com

Specializing in transition membranes and through-wall flashing, York has been inventing and producing flashings since 1935. As the leader in commercial and residential flashing industry, York has led the charge to create flashings that are compatible with the air barriers and insulations that populate the cavity wall.
