

Why is it Important for You to Protect Top-of-Walls?

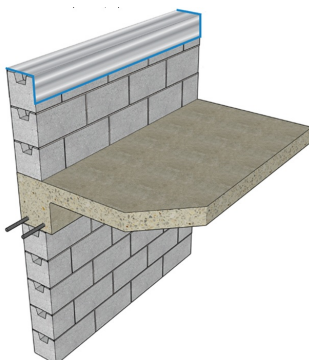

Protecting the walls from moisture during construction is the most effective means in preventing damage to the installed air barrier. [Review ABAA's position paper on how to stop water from getting into your walls during construction.](#)

yorkflashings.com

Specializing in transition membranes and through-wall flashing, York has been inventing and producing flashings since 1935. As the leader in commercial and residential flashing industry, York has led the charge to create flashings that are compatible with the air barriers and insulations that populate the cavity wall.
