Ensuring Self-Adhering Membranes Stick

Gravity presents a challenge for peel-and-stick membranes, particularly in vertical or inverted applications. While traditional products often require primers to ensure adhesion, advancements in adhesive formulations now offer primerless solutions that save costs, reduce labor, and enhance installer safety.

York Employee of the Year: Tony Bolduc

York Flashings is proud to announce **Tony Bolduc** as our **2024 Employee of the Year!**

Tony is known as the go-to person for everyone at our production facility. He brings a positive attitude, a collaborative spirit, and unparalleled problem-solving skills to everything he does. He's not just a great team member; he is a cornerstone of our success.

At York Flashings, we are deeply grateful for Tony's contributions and are honored to recognize his work and dedication. Congratulations, Tony—you truly embody excellence, and we're so fortunate to have you on our team!

Celebrating York Products in 2024

Product of the Year

Thank you for continuing to make **Flash-Vent SA SS** one of the industry leaders in stainless steel flashing solutions.

A flexible, stainless-steel flashing with butyl adhesive that promotes **continuous and active** water drainage from the wall, Flash-Vent SA SS:

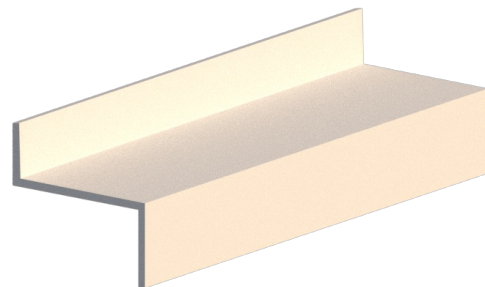

- Does not clog
- Eliminates the need for mortar netting
- Available In: Type 304 and Type 316 for more corrosive/coastal areas

Specializing in transition membranes and through-wall flashing, York has been inventing and producing flashings since 1935. As the leader in commercial and residential flashing industry, York has led the charge to create flashings that are compatible with the air barriers and insulations that populate the cavity wall.
