

Your Flashing Authority

Industry Article: Reduce Your Stress, Run a Good Preconstruction Project Meeting

How could preconstruction meetings prevent costly delays?

Construction projects often face delays, miscommunication, and rework due to missing details, unclear scopes, and lack of coordination between trades, leading to stress and inefficiencies.

A well-planned and executed preconstruction meeting helps mitigate these issues by ensuring open communication, refining schedules, identifying potential gaps, and clarifying responsibilities, ultimately improving project flow and reducing costly mistakes.

Specializing in transition membranes and through-wall flashing, York has been inventing and producing flashings since 1935. As the leader in commercial and residential flashing industry, York has led the charge to create flashings that are compatible with the air barriers and insulations that populate the cavity wall.
