

Flexo-Flash: No Primer Required Self-Adhering Through-Wall Flashing

Flexo-Flash is a robust, 40-mil self-adhering through-wall flashing designed to perform under the most demanding conditions. Its non-asphaltic, non-drooling adhesive ensures a clean application, while the reinforced polyethylene facer provides impressive durability with up to 120 days of UV resistance. This advanced construction offers outstanding protection against punctures, tears, and extreme heat. Additionally, Flexo-Flash streamlines your workflow by eliminating the need for primer —helping you save valuable time, reduce labor, and cut project costs.

- A York Termination Bar
- B Self-adhered, through-wall flashing
- C York UniverSeal
- D York SS Drip Edge
- E Weep Vent and Net

yorkflashings.com

Specializing in transition membranes and through-wall flashing, York has been inventing and producing flashings since 1935. As the leader in commercial and residential flashing industry, York has led the charge to create flashings that are compatible with the air barriers and insulations that populate the cavity wall.
